<b>Career Advice</b>	Get experience through volunteering, internships, research or seasonal work prior to graduation. ALL experience is important if it builds your resume and tells you more about what you do (or don't) want to do for a career. Contact grad students and faculty to see if they have openings in their research labs. Take intro classes and skills classes to learn more about your chosen field. Do informational interviews with professionals in the field - learn about what they do and how they got their positions. Join professional and student organizations. Attend workshops and conferences.						
<b>Participate!</b>	<b>ANNUAL ENVIRONMENTAL OPPORTUNITIES FAIR ~ OCTOBER ~ 10AM-2PM ~ MGH COMMONS</b>
